

SILVER PACKAGE

The Lynx Road Cycling Silver Package boasts one of the most powerful and versatile photo finish cameras available today – the **EtherLynx FUSION** with FLEX option. The Fusion's user-adjustable resolution makes it perfect for recording all type of cycling events, from crowded stage races to Velodrome sprints. The Fusion's ability to capture rich, 2,700-pixel high, full color images means that no road is too wide for a world-class Lynx system at your finish line. And with a maximum resolution of 3,000 frames-per-second (at 500 pixels), the Fusion camera with Flex option can capture every crucial millisecond of high-velocity sprints.

In addition to the Fusion photo finish camera with Flex rate/resolution and the ability to record images in full color (2,000,000+ colors), the Road Cycling Silver Package also includes all the necessary mounting hardware, cables, software, and technical support. The Virtual Photo Eye and Auto-Capture plug-in enhances the FinishLynx photo finish operation by automatically recording each rider's image for evaluation – without the need for any operator to capture the image: a patented feature that is unique to Lynx.

COMPONENTS

- **Camera - EtherLynx Fusion**, color, timer-enabled, FLEX option for up to 2,700 pixels image height or 3,000 fps

SILVER PACKAGE FEATURES

- The Fusion camera provides full color images for easy rider identification (2,000,000+ colors).
- The Fusion camera with Flex option allows you to adjust the optimal camera settings for any cycling event
- Automatic capture software means that you will never miss a rider in your photo finish images – if they cross the finish line, their finish image will be recorded automatically, without any operator intervention.
- FinishLynx software is preconfigured to assist with cycling specific functions like calculating pack leaders.

SILVER PACKAGE BENEFITS

The Silver Package combines FAT components that truly address the dynamic nature of cycling. Because events can vary greatly in their speed, distance, and format, it's crucial to have a photo finish system that performs flawlessly under any conditions. The heart of the Silver Package is its EtherLynx Fusion camera complimented by the Flex option for unrivaled event adaptability.

This Flex option has proven successful in many events that require wide finish lines and/or high-velocity FAT, including rowing, horse racing, and motor sports. In a cycling application, it allows you to adjust your Fusion camera settings based on the exact needs of your event – you're in complete control.

THE LYNX SILVER PACKAGE

Lynx photo finish packages add unwavering reliability to an otherwise unpredictable sport – that's why our systems have been used in almost every major cycling event from the US and Canadian Olympic Trials to the Tour de France – as well as at numerous high level UCI events around the world.

The Fusion's brilliant color images allow for easy jersey and rider identification, no matter how crowded the pack. And with a maximum height of 2,700 pixels, even the widest outdoor cycling finish lines can be captured with ease – at up to 1000fps with this maximum image height. Most importantly, the FinishLynx software integrates these photo finish images with a wealth of rider information to provide key event data in real-time. Add to these features the ability to transmit image data over a 100 megabit network, operate from a 12 volt battery power source, and even take advantage of the option to upgrade to completely wireless operation, and it is easy to see why the Fusion camera has become known as the most versatile photo finish camera ever produced.

Nothing you buy from Lynx will ever go to waste: the camera, software, and other accessories aren't just key components for the Cycling Bronze Package, but the entire line of Lynx photo finish technology. Should you ever decide to enhance your Silver Package, you can upgrade your existing components, or simply add new features like cameras or wireless capability. The Silver Package is a smart, long-term investment that will continue to benefit your cycling program for years to come. Join the growing number of cycling organizations across the world that are making the switch to Lynx.
